

The Swiss Philosophy

Switzerland is renowned for its healthy climate – but for NEOVIVA, a boutique rehab clinic overlooking Lake Lucerne, the surroundings are just part of the treatment

Located in an area often referred to as “The Riviera of Central Switzerland”, the exclusive boutique rehab clinic NEOVIVA (www.neoviva.com) nestles on the southern slopes of a mountain overlooking the world-famous Lake Lucerne.

In recent years, the area has established itself as one of Europe’s favourite destinations for medical treatments and wellness, with the beautiful location and setting playing an invaluable role in the treatment process.

From its enchanting grounds to the living quarters and therapy spaces, NEOVIVA is designed for authentic comfort and successful healing, with additional medical infrastructure such as hospitals, consulting physicians, and partner clinics located close by.

Its residential setting within a private section of a public hotel is carefully chosen as it reflects real-life scenarios where clients

confront triggers like social gatherings or alcohol consumption. CEO and founder Oliver Neubert says that generally, when clients reach out to NEOVIVA, it is because they are struggling with drug or alcohol-related challenges, but NEOVIVA’s emphasis transcends mere abstinence or detoxification.

Supported by NEOVIVA’s therapeutic team, clients explore underlying issues, benefiting from a holistic approach spanning the medical, psychological, and social facets of their lives.

COMPREHENSIVE

“We meticulously take into account personal factors such as cultural backgrounds”, says Oliver Neubert. “By discerning the desires and wishes of our clients and identifying areas of dysfunction, our thoughtfully balanced treatment program is designed to bolster the client’s recovery process

across biological, psychological, and social dimensions.”

“An additional facet of our treatment addresses the ‘spiritual’ or ‘philosophical’ dimensions of the client’s life, aiding them in navigating profound questions of meaning and purpose.

“NEOVIVA’s approach is truly comprehensive, embracing all aspects of the individual. Moreover, with addiction being a “family disease,” the clinic extends support to their clients’ families and those close to them.”

This involves acknowledging the therapeutic value of pets and, more importantly, underscoring the enduring commitment beyond the on-site stay, where ongoing care is deemed crucial for sustainable outcomes. NEOVIVA’s continuing care group, led by a team member, is available to former clients free of charge for as long as they wish. ♦
